## Principal's Corner

Sometimes it seems the harder we try, the more work we have; or we forget to do something and end up scrambling to finish before a deadline. As human beings, we cannot be perfect, or we would not have needed a Savior. But we can strive to do better. Jesus came into the world to die for our sins, but God desires us to try and live a holy life each and every day. We have the law to show us how we should live but we also have the Gospel which is God's grace given to us when we confess that we have messed up and need to do better. Keep running the race with the effort to do our best knowing God has us in his hands to take care of us and love us.

**Last Day for Midterms** for grades 3-8 will be Friday, October 1. Be sure all homework is completed and turned in. Midterms will be sent home with students on Tuesday, October 5.

**September Chapel Offerings** will go for the **Haiti Disaster Response**. Our chapel offerings will help support these efforts. \$220.11 has been received to date. One more week to give to this cause. *Please give generously of the gifts God has first given you. God takes care of us, let's reach out and help take care of others.*

### What are cells? & What are cells made of?

Our 7<sup>th</sup> grade students learned about all the different organelles in cells and what makes a cell. This included creating a 3D representation of a plant or animal cell. They had a list of organelles they had to include in their creation. They also had to write down each of the organelles and their function. Such as the Nucleus is the brain of the cell and controls the functions of the cells. The Mitochondria are the energy factory of the cell and takes in materials to create into energy for the cell to use. Though cells are small, together they form tissues that themselves form organs, and eventually entire organisms.
